DIGITAL LITERACY PROJECT REPORT

Course Code: CSE0001

Course Title: Digital Literacy

Name: Sarthak Shukla

Registration No.: 25BAI10023

Branch: B.Tech CSE(AI ML)

Year: 1st Year

Introduction

In today's rapidly evolving digital world, digital literacy has become an essential skill for students. It is not limited to knowing how to use devices but also includes understanding how to communicate, collaborate, and stay safe online. As a Student Digital Ambassador, my role is to guide my peers in adopting responsible and effective digital practices. This project provided me with an opportunity to explore multiple dimensions of digital literacy through practical tasks. These tasks included designing awareness content, building a digital portfolio, exploring coding platforms, practicing professional communication, and studying cybercrime awareness. Each activity contributed to enhancing my technical knowledge and awareness. Overall, this project has helped me understand how digital tools can be used productively in academic and professional environments. It also encouraged me to reflect on my own digital habits and improve them for long-term growth.

It also encouraged me to reflect on my own digital habits and improve them for long-term growth.

Task 1: Digital Literacy Awareness Infographic

For this task, I created a digital infographic using Canva. The purpose of this infographic was to educate students about digital literacy and its importance. I included topics such as safe internet practices, digital tools for students, and professional communication. Designing the infographic required careful planning to ensure that the content was both informative and visually appealing. I used icons, headings, and structured layouts to make the information easy to understand. One challenge I faced was managing the balance between content and design. Too much information could make the infographic cluttered, while too little would make it less informative. This task improved my creativity and ability to present information concisely.

Task 2: Student Digital Portfolio

In this task, I developed my professional digital presence by creating profiles on GitHub, LinkedIn, and HackerRank. Each platform serves a unique purpose in building a student's career. GitHub is essential for showcasing projects and technical skills. LinkedIn helps in networking and building professional connections. HackerRank is useful for practicing coding and improving problem-solving abilities. I plan to consistently update these platforms over the next four years by adding projects, achievements, and certifications. This will help me build a strong portfolio for internships and job opportunities.

Task 3: Coding & Collaboration Platforms

For this task, I explored both coding and collaboration tools. I completed a beginner-level problem on HackerRank, which helped me understand coding logic and platform usage. Additionally, I created a Google Form quiz on digital literacy. This allowed me to learn how to design surveys and analyze responses using Google Sheets. These tools are highly beneficial for academic purposes. They simplify tasks such as assessments, feedback collection, and collaborative learning. This task improved my understanding of how technology supports education.

This task improved my understanding of how technology supports education.

Task 4: Email Etiquette & Communication

In this task, I learned the importance of professional communication. I wrote two formal emails—one requesting an extension and another applying for an internship. I also created a checklist of Do's and Don'ts for social media usage. This emphasized responsible online behavior and maintaining a positive digital image. Poor communication can lead to misunderstandings and missed opportunities. This task helped me understand how proper structure, tone, and clarity are essential in professional communication.

Task 5: Cybercrime Awareness

For this task, I studied UPI payment fraud as a common cybercrime. I learned how attackers use phishing techniques and social engineering to trick users into sharing sensitive information. This research made me realize how important awareness is in preventing cybercrime. Many users fall victim due to lack of knowledge and urgency. I will adopt safer practices such as verifying links, avoiding suspicious messages, and never sharing confidential information online. This task significantly improved my awareness of digital safety.

Conclusion

This Digital Literacy project has been an enriching experience. It helped me gain practical knowledge about digital tools, communication, and online safety. I developed skills that will be useful not only in academics but also in my professional career. The project also encouraged me to adopt responsible digital habits. Overall, this experience has strengthened my confidence in using digital platforms effectively and responsibly.
